Notes to Physician: Treat symptomatically

4.2 Most important symptoms and effects (acute or delayed)

Most important symptoms and effects (acute or delayed) : No special precautions are necessary for first aid responders

Section 05: Fire-fighting measures

5.1 Extinguishing media

Suitable extinguishing media	Use extinguishing measures that are appropriate to local circumstances and the surrounding environment
Unsuitable extinguishing media	High volume water jet
Specific hazards during fire fighting	Fire Hazard Keep away from heat and sources of ignition. Flash back possible over considerable distance. Beware of vapors accumulating to form explosive concentrations. Vapors can accumulate in low areas.
Hazardous combustion products	Carbon oxides
Special protective equipment for fire-fighters	Use personal protective equipment.
Specific extinguishing methods	Use water spray to cool unopened containers. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations. In the event of fire and/or explosion do not breathe fumes

Section 06: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Protective equipment	Remove all sources of ignition. Ensure clean-up is conducted by trained personnel only. Wear appropriate protective equipment such as Gloves. Safety goggles. Cover all and protective clothing.
Small Spill	: Dilute with water and mop up, or absorb with an inert dry material and place in an appropriate waste disposal container.

Safety Data Sheet

Large spill	: Flammable. Keep away from heat. Keep away from sources of ignition. Stop leak if without risk.
6.2 Methods and materials for containment and cleaning up	
Emergency procedures	:Mark the danger area. Consider evacuation. Stop engines and no smoking. No naked flames or sparks. Spark- and explosion-proof of appliances and lighting equipment. Keep containers closed.
Environmental precautions	:Do not allow contact with soil, surface or ground water
Cleaning procedure	:Eliminate all ignition sources if safe to do so. Stop leak if safe to do so. Contain spillage, and then collect with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local / national regulations (see section 13). Flush away traces with water. For large spills, dike spilled material or otherwise contain material to ensure runoff does not reach a waterway.

Section 07: Handling and storage

7.1 Precautions for safe handling	
Precautions for safe handling	Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapors). Keep away from fire, sparks and heated surfaces
7.2 Conditions for safe storage(including incompatible materials)	
	Keep away from heat and sources of ignition. Keep in a cool, well-ventilated place. Keep away from oxidizing agents. Keep out of reach of children. Keep container tightly closed. Store in suitable labeled containers. Storage temperature 0°C to 35°C
Others	Good personal hygiene practices are suggested, such as abstaining from eating, drinking and smoking in the workplace
